1. Qualitative Information on Quarterly Consolidated Financial Performance

(1) Qualitative Information Regarding Consolidated Results of Operations

Although the Japanese economy for the first half of the fiscal year under review showed signs of a moderate recovery, which was supported by fully fledged reconstruction demand after the earthquake disaster and solid consumer spending, its future prospects still remained uncertain due to factors such as prolonged appreciation of the yen and concerns over the global economic slowdown stemmed from the European debt problem.

Looking at the world economy, the US and some other economies are showing solid signs of recovery despite its strength being rather weak while Europe is facing a fiscal crisis and China, as well as other emerging countries, is showing a noticeable economic slowdown. Overall, the global business climate still remains uncertain. In the electronic devices market, which is the Group's main market area, sales for smartphones and tablet terminals grew but that for PCs, flat-screen TVs and other digital home appliances stayed sluggish due to lower selling prices and inventory adjustment.

In this management environment, the Group has focused its management efforts on thorough cost reductions, development of high value-added products and aggressive proposal and sales activities so as to make its operations more profitable.

As a result, consolidated sales for the first half of the current fiscal year amounted to 18,391 million yen (down 8.9% year-over-year), operating income 1,910 million yen (down 27.1%), ordinary profit 1,965 million yen (down 24.5%), while net income for the same period amounted to 1,561 million yen (up 7.0%) as a result of reporting insurance income from the Thai floods as an extraordinary income.

Performance by business segment is shown as below with year-over-year comparison presented as reference.

1) Surface finishing materials business

While there remained to be a solid demand of the mainstay plating chemicals for printed wire boards (PWBs) for smartphones and tablet terminals, earnings came under severe pressure due to poor PC sales and intensifying competition in the emerging markets. Especially, sales of plating chemicals for hard disks declined substantially due to weakness in PC demand. Sales of industrial chemicals and non-ferrous metals decreased due to a drop in LME nickel prices.

As a result, sales in the surface finishing materials business decreased 4.3% year-over-year to 15,198 million yen, and operating income decreased 5.7% to 1,930 million yen.

2) Surface finishing machinery business

In contrast to the market situation in China where we continued to see a strong customer inquiry for the surface finishing machines, the order receiving environment in Japan remained challenging across the board as we saw the domestic customers take an even more prudent approach to capital investment given the continued uncertainty over the domestic economic outlook.

As a result, sales in the surface finishing machinery business decreased 23.0% year-over-year to 1,938 million yen, while there was an operating loss of 98 million yen (an operating income of 116 million yen in the same period previous fiscal year).

3) Plating job business

Although the consolidated subsidiary in Thailand, which is our main manufacturing base, has now recovered its manufacturing operations thanks to strong automobile sales in this country, sales as well as operating income for the first half of the fiscal year under review saw a year-over-year decrease due to the effect of the shutdown of its flood-hit factory during the first quarter of the subsidiary's fiscal year (from January to March 2012).

As a result, sales in the plating job business decreased 32.7% year-over-year to 1,007 million yen, and there was an operating loss of 128 million yen (an operating income of 247 million yen in the same period previous fiscal year).

4) Real estate rental business

Due to a decline in the occupancy rate and rents of the office buildings, sales decreased year-over-year. However, operating income showed an increase thanks to a reduction in overhead expenses.

As a result, sales in the real estate rental business decreased 1.4% year-over-year to 373 million yen, and operating income increased 1.7% to 205 million yen.

Please note that internal sales and transfers generated between segments are included in the above results for segment.

(2) Qualitative Information Regarding Consolidated Financial Position

1) Changes in financial position

Total assets increased 1,433 million yen from the end of the previous fiscal year to 47,520 million yen at the end of the second quarter of the current fiscal year. This was primarily attributable to a 1,003 million yen increase in construction in progress and a 643 million yen increase in buildings and structures. On the other hand, we posted a 600 million yen decrease in long-term deposits with banks and a 558 million yen decrease in cash and deposits with banks.

Liabilities increased 7 million yen to 12,431 million yen. This was primarily attributable to a 198 million yen increase in long-term loans payable and a 114 million yen increase in deferred tax liabilities (non-current). On the other hand, we posted a 161 million yen decrease in income taxes payable and a 154 million yen decrease in current portion of long-term loans payable.

Net assets increased 1,425 million yen to 35,088 million yen. This was primarily attributable to a 1,060 million yen increase in retained earnings and a 343 million yen increase in foreign currency translation adjustments. On the other hand, we posted a 112 million yen decrease in cumulative securities holding gain.

As a result, equity ratio increased by 0.6 percentage points from 69.7% at the end of the previous fiscal year, to 70.3%.

2) Cash flows

Cash and cash equivalents at the end of the second quarter of the current fiscal year decreased 1,099 million yen from the end of the previous fiscal year to 13,250 million yen.

A summary of cash flows is as follows:

(Cash flows from operating activities)

Net cash provided by operating activities was 1,689 million yen (1,564 million yen in the same period previous fiscal year). Positive factors included net income before income taxes and minority interests of 2,603 million yen and proceeds from insurance income of 638 million yen, while negative factors included payments for loss on disaster of 608 million yen and income taxes paid of 859 million yen.

(Cash flows from investing activities)

Net cash used in investing activities was 2,409 million yen (1,890 million yen in the same period previous fiscal year). This was mainly due to a 2,506 million yen payment for acquisition of fixed assets.

(Cash flows from financing activities)

Net cash used in financing activities was 522 million yen (152 million yen in the same period previous fiscal year). Negative factors included cash dividends paid of 500 million yen, while positive factors included 300 million yen in proceeds from long-term loans payable.

(3) Qualitative Information Regarding Consolidated Forecast

Based on recent performance trends, the Company has revised its consolidated forecasts for the fiscal year ending March 31, 2013 released on May 15, 2012.

Actual results are affected by various factors and may differ substantially.

2. Matters Related to Summary Information (Notes)

(1) Changes in Consolidated Subsidiaries during the Period

In the second quarter of the current fiscal year, PT.UYEMURA INDONESIA was included in the consolidation as its establishment.

(2) Application of the Specific Method for Accounting Treatment for Preparation of Quarterly Consolidated Financial Statements

Not applicable.

(3) Changes in Accounting Policies and Accounting-based Estimates, and Restatements

Changes in accounting policies that are difficult to distinguish from changes in accounting-based estimates

Following tax law revisions, from the first quarter of the current fiscal year, the Company and its domestic consolidated subsidiary have changed the method of depreciation of tangible fixed assets (excluding buildings except attached structures) acquired on or after April 1, 2012 in line with methods prescribed in the revised Corporation Tax Law.

The effect of this change on operating income, ordinary profit and net income before income taxes and minority interests for the first half of the current fiscal year is insignificant.
